## EDUCATION

### VIT Bhopal University

*Bachelor of Technology in Computer Science and Engineering (with AIML) | GPA: 8.37*

Bhopal, MP

*Expected 2027*

## TECHNICAL SKILLS

**Languages:** C/C++, Java, JavaScript, TypeScript, Go, SQL

**Backend & Cloud:** Node.js, Docker, AWS, Vercel, Linux

**Frontend & UI:** React, Next.js, Tailwind CSS, Redux, Shadcn/UI, Framer Motion

**Databases & ORMs:** PostgreSQL, MongoDB, Redis, Prisma ORM, Mongoose

**Tools & Practices:** Git, GitHub Actions (CI/CD), Postman, Unit Testing, System Design

## PROJECTS

### Workspace | *Next.js, Tailwind CSS, TypeScript*

Jan 2025 – Present

- Developed a blazing fast, distraction-free developer start page with universal search across Google, DuckDuckGo, and Brave.
- Built an integrated Action Palette allowing instant access to dev tools like NPM, GitHub, and Stack Overflow via keyboard shortcuts.
- Implemented comprehensive customization options including focus mode, dynamic backgrounds, and a persistent notes widget.
- Prioritized privacy by architecting a local-first system that stores all user data and configurations securely in browser localStorage.

### BuildLog | *Next.js, Tailwind CSS, TypeScript*

Dec 2024 – Present

- Developed a calm, local-first developer journal allowing users to document engineering journeys through markdown logs.
- Implemented a markdown-based logging system with real-time preview and a command palette for global search.
- Designed for privacy and data ownership using localStorage with full JSON export/import functionality.
- Optimized for keyboard-centric workflows with integrated shortcuts for efficient project and log management.

### AtlasUI | *Next.js, Tailwind CSS, TypeScript*

May 2025 – Present

- Developed a curated collection of copy-paste components for Next.js and Tailwind CSS, focusing on minimalism and performance.
- Engineered a zero-runtime overhead architecture by utilizing pure Tailwind CSS v4, eliminating heavy utility dependencies.
- Implemented a "Code-First" philosophy allowing developers full ownership and control over component integration.
- Designed a monochrome aesthetic for focused development, optimized for modern React functional components.

### VITB Mess App | *React, Tailwind*

Oct 2023 – April 2024

- Developed a responsive web application to track the weekly mess timetable for breakfast, lunch, snacks, and dinner at VIT Bhopal.
- Implemented real-time updates to timetables and improved user experience across devices.
- App gained 30k+ views and helped students easily access and track the mess schedule.

## LEADERSHIP & INVOLVEMENT

### Technical Teams

Sept 2024 – Present

*Various Clubs*

*VIT Bhopal University, MP*

- Leading Software Development Cell at Android Club VITB, overseeing technical projects and team collaboration.
- Leading Technical Team at FinTech Club VITB, managing development sprints and club technical initiatives.
- Active member of reputed technical communities including GDGC, Cisco, and Blockchain Club at VITB.
- Participated in multiple national-level hackathons, showcasing technical expertise and team leadership.
