EDUCATION

VIT Bhopal University

Bachelor of Technology in Computer Science and Engineering (with AIML) | GPA: 8.47

Bhopal, MP

Expected 2027

TECHNICAL SKILLS

Languages: C/C++, Java, JavaScript, TypeScript, Go, SQL

Frontend: React, Next.js, Tailwind CSS, Redux

Backend & Databases: Node.js, PostgreSQL, MongoDB, Redis, Prisma ORM, Mongoose

Cloud & Deployments: AWS (EC2, S3, Lambda, VPC, RDS, IAM, Route 53), Docker, Vercel, Linux

Tools & Practices: Git, GitHub Actions (CI/CD), Postman, Jira (Unit Testing), System Design

PROJECTS

Plutus | *Next.js, Socket, PostgreSQL, Redis*

Nov 2025 – Feb 2026

- Architected a comprehensive group expense management application equipped with real-time debt simplification logic and automated smart settlement suggestions.
- Implemented robust multi-currency support that automatically converts and unifies international expenses to ensure accurate tracking for cross-border travel.
- Designed interactive, graph-based visualizations to map financial relationships and built a unified dashboard consolidating balances, transaction histories, and spending insights.

Eventsnap | *AI/ML, Next.js, Tailwind CSS*

May 2025 – Dec 2025

- Engineered an AI-powered photo distribution platform leveraging facial recognition models to instantly match and distribute event photos to attendees.
- Built a robust organizer dashboard facilitating batch ZIP uploads, real-time image indexing, and unique access code generation for seamless gallery management.
- Developed a privacy-focused attendee portal featuring a guided 3-angle selfie capture for high-precision matching and direct downloads of personalized, high-resolution galleries.

BuildLog | *Next.js, Tailwind CSS, TypeScript*

Dec 2024 – Jan 2025

- Developed a calm, local-first developer journal allowing users to document engineering journeys through markdown logs.
- Implemented a markdown-based logging system with real-time preview and a command palette for global search.
- Designed for privacy and data ownership using localStorage with full JSON export/import functionality.
- Optimized for keyboard-centric workflows with integrated shortcuts for efficient project and log management.

VITB Mess App | *React, Tailwind*

Oct 2023 – April 2024

- Developed a responsive web application to track the weekly mess timetable for breakfast, lunch, snacks, and dinner at VIT Bhopal.
- Implemented real-time updates to timetables and improved user experience across devices.
- App gained 30k+ views and helped students easily access and track the mess schedule.

LEADERSHIP & INVOLVEMENT

Technical Teams

Sept 2024 – Present

Various Clubs

VIT Bhopal University, MP

- Leading Software Development Cell at Android Club VITB, overseeing technical projects and team collaboration.
- Leading Technical Team at FinTech Club VITB, managing development sprints and club technical initiatives.
- Active member of reputed technical communities including GDGC, Cisco, and Blockchain Club at VITB.
- Participated in multiple national-level hackathons, showcasing technical expertise and team leadership.
